Contents of volume 95

Number 1

Regular articles

JESSICA A. SOMMERVILLE (*University of Washington*) and AMANDA L. WOODWARD (*The University of Chicago*)
Pulling out the intentional structure of action: the relation between action processing and action production in infancy, 1–30

CAROLYN E. WILSHIRE (*Victoria University of Wellington*) and ELEANOR M. SAFFRAN (*Temple University*)
Contrasting effects of phonological priming in aphasic word production, 31–71

IRINA M. HARRIS and PAUL E. DUX (*Macquarie University*)
Orientation-invariant object recognition: evidence from repetition blindness, 73–93

PIA KNOEFERLE, MATTHEW W. CROCKER (*Saarland University*), CHRISTOPH SCHEEPERS (*University of Dundee*) and MARTIN J. PICKERING (*University of Edinburgh*)
The influence of the immediate visual context on incremental thematic role-assignment: evidence from eye-movements in depicted events, 95–127

Number 2

Regular articles

SU-HUA WANG (*University of California*), RENÉE BAILLARGEON (*University of Illinois at Urbana-Champaign*) and SARAH PATERSON (*Rutgers University*)
Detecting continuity violations in infancy: a new account and new evidence from covering and tube events, 129–173

GREGORY L. MURPHY (*New York University*) and BRIAN H. ROSS (*University of Illinois*)
The two faces of typicality in category-based induction, 175–200

STEVEN PINKER (*Harvard University*) and RAY JACKENDOFF (*Brandeis University*)
The faculty of language: what's special about it?, 201–236

Brief articles

LESLIE A. NOTMAN, PAUL T. SOWDEN and EMRE ÖZGEN (*University of Surrey*)
The nature of learned categorical perception effects: a psychophysical approach, B1–B14

BOB MCMURRAY and RICHARD N. ASLIN (*University of Rochester*)
Infants are sensitive to within-category variation in speech perception, B15–B26

DIMA AMSO and SCOTT P. JOHNSON (*New York University*)
Selection and inhibition in infancy: evidence from the spatial negative priming paradigm, B27–B36

Number 3

Regular articles

JULIE E. BOLAND (*University of Michigan*)
Visual arguments, 237–274

DANIEL GRODNER (*Brown University*), EDWARD GIBSON (*Massachusetts Institute of Technology*) and DUANE WATSON (*University of Rochester*)
The influence of contextual contrast on syntactic processing: evidence for strong-interaction in sentence comprehension, 275–296

YUYAN LUO and RENÉE BAILLARGEON (*University of Illinois*)
When the ordinary seems unexpected: evidence for incremental physical knowledge in young infants, 297–328

J.A. STEVENS (*College of William & Mary*)
Interference effects demonstrate distinct roles for visual and motor imagery during the mental representation of human action, 329–350

Brief articles

LISA FEIGENSON (*Johns Hopkins University*)
A double-dissociation in infants' representations of object arrays, B37–B48

AKIKO ARITA, KAZUO HIRAKI (*The University of Tokyo*), TAKAYUKI KANDA (*Intelligent Robotics and Communication Laboratories*) and HIROSHI ISHIGURO (*Osaka University*)
Can we talk to robots? Ten-month-old infants expected interactive humanoid robots to be talked to by persons, B49–B57

SANDRA R. WAXMAN and IRENA BRAUN (*Northwestern University*)
Consistent (but not variable) names as invitations to form object categories: new evidence from 12-month-old infants, B59–B68
